

ECE750T: Research Project Proposal

Your Project Title

Your Name | Your Student ID
University of Waterloo | Fall 2026

Q1: Research Question

[State your question in plain language and explain its relevance to Responsible AI (possibly including topics we haven't yet covered in class).]

Q2: Prior Work and Limitations

[Describe 3–5 relevant works and their limitations. Cite the papers you discuss. Add your own entries to references.bib and cite them with `\citep{key}` or `\citet{key}`. Example citation (replace with your own sources): [Chouldechova](#) [2017].]

Q3: Novelty of Approach

[Explain what is new or different about your approach, application, or comparison.]

Q4: Impact and Motivation

[Explain why the question matters and who would benefit from the results.]

Q5: Risks and Assumptions

[Identify key assumptions and possible failure modes.]

Q6: Resources

[Describe the data, compute, or other materials you need and how you will obtain them. Distinguish resources already available from access still to be arranged.]

Q7: Weekly Plan

Week	Plan
Oct 12–18 (reading week)	[Milestone]
Oct 19–25	[Milestone]
Oct 26–Nov 1	[Milestone]
Nov 2–8	[Milestone]
Nov 9–15	[Milestone]
Nov 16–22	[Milestone]
Nov 23–29	[Milestone]
Nov 30–Dec 4	[Milestone]

Q8: Milestones and Success Criteria

[Define evaluation criteria, baselines or other comparisons, and what you expect to learn. Include quantitative and/or qualitative criteria as appropriate.]

Tools and Assistance

[If you plan to use AI tools in your research, briefly describe how. As relevant, mention any other relevant resources (archives, software used within your lab) that will play a significant role in your project's success.]
